

Brainstorming & Idea Prioritization Template

Date	02 July 2026
Team ID	SWTID-2026-9778
Project Name	Credit Card Approval Prediction
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Gorantla Anil Kumar	Build a machine learning model to predict whether a credit card application will be approved or rejected.	Prediction Model	1
2	KARAPAKULA NANDISWAR	Build a machine learning model to predict whether a credit card application will be approved or rejected.	Data Analysis	1
3	Boddu Sumanth	Create a preprocessing pipeline to handle missing values, encode categorical variables, and normalize numerical features.	Data Preprocessing	2
4	Varun Kumar Reddy Chintha	Compare classification algorithms like Logistic Regression, Decision Tree, Random Forest, and XGBoost.	Model Selection	2
5	Dhanush Tirumanyam	Develop a dashboard or interface where users can input applicant details and	Application Interface	3

Brainstorming & Idea Prioritization Template

		receive approval predictions.		
6	Gorantla Anil Kumar / Team	Evaluate the model using accuracy, precision, recall, F1-score, and confusion matrix to choose the best solution.	Evaluation	3

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Use applicant financial and personal data to predict credit card approval status.	High	High	1	Yes
2	Build and compare multiple machine learning classification models for the best prediction accuracy.	High	High	2	Yes
3	Create a simple user interface/dashboard for entering applicant details and displaying predictions.	Medium	Medium	3	Yes
